FOR IMMEDIATE RELEASE

NOTE TO EDITORS:

The NRC staff will meet with Northeast Utilities officials on Wednesday, February 17, to discuss the results of the NRC's corrective action inspection at Millstone Unit 2.

The meeting, which begins at 1 p.m., will be held at the Leland F. Sillin Training Center at the Millstone site. The meeting is open to public observation.

The objective of the inspection, known as the 40500 inspection, is to evaluate the effectiveness of licensee controls in identifying, resolving and preventing issues that degrade the quality of plant operations or safety.
