SUBJECT: PALISADES PLANT - CORRECTION TO AMENDMENT NO. 189  
(TAC NO. MA8594)

Dear Mr. Malone:

On November 30, 1999, the Commission issued Amendment No. 189 to Facility Operating License No. DPR-20 for the Palisades Plant. The amendment changed the Technical Specifications (TSs) to convert the current TSs (CTS) to improved TSs (ITS) based upon NUREG-1432, "Standard Technical Specifications, Combustion Engineering Plants," Revision 1, dated April 1995, with certain additional approved guidance and changes. Amendment No. 189 was intended to reflect appropriate changes based upon all previously approved changes to the CTS. However, Amendment No. 189 failed to reflect a change to CTS 6.5.14, "Programs and Manuals--Containment Leak Rate Testing Program," that the NRC staff had approved by Amendment No. 188, dated November 15, 1999. Please substitute the enclosed ITS page 5.0-21 for the corresponding page previously issued with Amendment No. 189. The new page changes ITS 5.5.14 to be consistent with the change to CTS 6.5.14 previously approved by Amendment No. 188. Specifically, the value for the peak calculated containment internal pressure for the design-basis loss-of-coolant accident is changed from 52.64 psig to 53 psig, and the reference to FSAR Table 14.18.1-4 is deleted.

Sincerely,

*/RA/*

Darl S. Hood, Senior Project Manager, Section 1  
Project Directorate III  
Division of Licensing Project Management
