Subject: Waterford 3 SES
Docket No. 50-382
License No. NPF-38
Technical Specification Change Request NPF-38-222
High Pressure Safety Injection Allowed Outage Time
Increase Withdrawal Notification

Gentlemen:

Entergy is hereby withdrawing Technical Specification Change Request (TSCR) NPF-38-222 submitted via Letter W3F1-99-0023 dated August 4, 1999. The TSCR requested the modification of Technical Specifications (TS) 3.5.2 and 3.5.3 as supported by the Joint Application Report CE NPSD-1041, "Joint Applications Report for High Pressure Safety Injection System Technical Specification Modifications." In a discussion with the Project Managers for Waterford 3 and Combustion Engineering, Entergy was informed the Joint Application Report did not provide sufficient justification.

Following CE's revision of the Joint Application Report, Entergy will determine whether to submit a new TSCR.

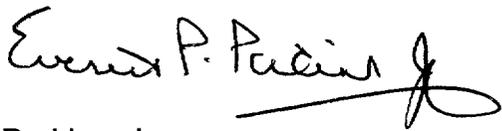

ADD 1

Technical Specification Change Request NPF-38-222
High Pressure Safety Injection Allowed Outage Time
Increase Withdrawal Notification
