Buchanan, MI 49107

SUBJECT: DONALD C. COOK NUCLEAR PLANT UNITS 1 AND 2 - CORRECTION TO
AMENDMENTS NO. 243 UNIT 1 AND AMENDMENT NO. 224 UNIT 2
(TAC NOS. MA4922 AND MA4923)

Dear Mr. Powers:

On March 31, 2000, the Nuclear Regulatory Commission (NRC) issued Amendment No. 243 to Facility Operating License No. DPR-58 and Amendment No. 224 to Facility Operating License No. DPR-74 for the Donald C. Cook Nuclear Plant (D. C. Cook), Units 1 and 2. The amendments made administrative changes to several Technical Specifications (TSs) to remove obsolete information, provide consistency between Unit 1 and Unit 2, provide consistency with the Standard Technical Specifications, provide clarification, and correct typographical, as requested by application dated December 3, 1998, from Indiana Michigan Power Company (I&M).

By letter dated April 21, 2000, (I&M) identified three errors on the TSs pages issued in the Amendments. Two of the errors were typographical errors on pages 5-6 (Unit 1) and 3/4 4-13 Unit 2. For Unit 1 page 5-6, a typographical error was introduced whereby the negative sign preceding the constant (26,745) in an equation contained in TS 5.6.1.1.c.3 was improperly spaced too far from the constant. For Unit 2 page 3/4 4-13, the equation in a footnote to Table 4.4-2 had a division sign (\div) erroneously replaced by an addition sign (+). The equation was not part of the requested changes to the TS.

For Unit 2 page 5-6, the page issued in License Amendment No. 224 did not reflect changes to the page made in previous License Amendment No. 220 for Unit 2. The application which resulted in the NRC issuing License Amendment No. 220 was submitted after the application which resulted in the NRC issuing Amendment No. 224. The specific changes to page 5-6 implemented by Amendment No. 220 were completely different changes than those implemented by the issuance of Amendment No. 224.

Since the three errors introduced by the issuance of Amendment Nos. 243 and 224 were not addressed in the significant hazards consideration noticed to the public and was not addressed by the NRC staff review, the corrections of these errors are not considered "changes" to the D. C. Cook TSs pursuant to 10 CFR 50.92. Accordingly, the corrected TS pages are enclosed with this letter.

Mr. R. Powers
