Ladies/Gentlemen:

DOCKETS 50-266 AND 50-301  
ANNUAL MONITORING REPORT  
WISCONSIN ELECTRIC POWER COMPANY  
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

Enclosed is the Annual Monitoring Report for Point Beach Nuclear Plant, Units 1 and 2, for the period January 1, 1999, through December 31, 1999. This report is submitted in accordance with Technical Specification 15.7.8.4.A. The Annual Monitoring Report contains information regarding plant releases, solid waste shipments, new and spent fuel shipments, results from the radiological environmental monitoring program, as well as miscellaneous reportable items from this reporting period.

This report also covers the results of the radiological monitoring of the Point Beach Nuclear Plant Independent Spent Fuel Storage Installation (ISFSI). Separate reports had been submitted; however, because PBNP is a part 50 license holder, the ISFSI monitoring results will be covered under the Annual Monitoring Report for the site as allowed by 10 CFR 72.44.

The Environmental Manual (EM), Offsite Dose Calculation Manual (ODCM), and Radiological Effluent Control Manual (RECM) were revised in 1999. A copy of the EM, ODCM, and RECM are enclosed. The EM was revised twice during 1999. Copies of both revisions are included.

Sincerely,

A. J. Cayia  
Manager,  
Site Services & Assessment
