Ms. Barbara Sauers
Highway Safety Specialist
NTS-22
National Highway Traffic
Safety Administration
400 7th Street, S.W.
Washington, DC 20590

Dear Ms. Sauers:

I am providing information regarding NRC's efforts to increase employee seat belt use, in accordance with Executive Order 13043, *Increasing Seat Belt Use In The United States*, as requested in the letter from Secretary Rodney Slater, dated December 17, 1999, to former U.S. Nuclear Regulatory Commission (NRC) Chairman Shirley Ann Jackson.

NRC has established various methods to advise employees of the agency's policy on the use of seat belts. These methods include distribution of printed materials to employees on the vehicle logs that inform vehicle users of the mandatory requirement to use seat belts each time a government vehicle is used; signs posted in our parking garage to remind employees to buckle up before leaving the building; and articles promoting the use of seat belts in the employees' newsletter. Recently, we began printing "buckle up" on all outgoing U.S. official mail. In addition, we will continue to include special dates from the National Traffic Safety Campaign Calendar in our employees' newsletter. Thank you for the opportunity to complete the seat belt survey online. We look forward to receiving the survey data and the NHTSA sponsored "How To" guide which we will use in developing future strategies for increased seat belt use at NRC.

If you need additional information, please contact Bonita Cook at 301-415-2092 or bdc@nrc.gov.

Sincerely,

/RA/

Michael L. Springer, Director
Office of Administration
