

REGION IV OPERATING TEST JOB PERFORMANCE MEASURE QUALITY REVIEW MATRIX											
JPM#	1. Dyn (D/S)	2. LOD (1-5)	3. Attributes					4. Job Content Errors		5. U/E/S	6. Explanation (See below for instructions)
			IC Focus	Cues	Critical Steps	Scope (N/B)	Over- lap	Job- Link	Minutia		
PART A											
STAFF02	NA	2			✓					E	Step 20 appears to be critical
PMS001*	NA	2/1								S/U	Does not discriminate for SROU
CNMT1*	NA	3/2								S	
STAFF01*	NA	2								S	
Leakrate01*	NA	1	✓				✓			U	Weak initiating cue. Minimal diagnostic application required. Scenarios contain RCS leakage that result in similar EAL
PART B											
AACSU*	S	1				N				U	Simplistic task w/ only one critical step. Discriminates too low.
AFW001*	D	2			✓					E	Steps 3, 12, 14, and 15 appear to be critical
CVCS1	S	2					✓			E	This appears to test the same system knowledge and ability as event 4 of scenario 1
CCP01*	S	2			✓		✓			E	This appears to test the same system knowledge and ability as event 2 of scenario 1. Steps 4, 6, and 9 appear to be critical
CEA03*	S	2			✓					E	Steps 3, 8, 10, and 14 appear to be critical
H2001	S	2						✓		E	The critical performance attribute for operating the H2 recombiners is to attain the proper operating temperature. Calculating the correction factor is a facilitating activity but is not critical.
PZR02	S	3								S	
RCP02	S	3								S	
LRWLR*	S	2			✓					E	Step 8 appears to be critical.
SWCSP	S	1								U	Simplistic task. Discriminates too low.
(*SROU)											

Instructions for Completing Matrix (Complete for either all items or all items requiring comment):

1. Determine whether the task is dynamic (D) or static (S). A dynamic task is one that involves continuous monitoring and response to varying parameters. A static task is basically an system reconfiguration or realignment.
2. Determine level of difficulty (LOD) using established 1-5 rating scale.
3. Check the appropriate box when an attribute weakness is identified:
 - The initiating cue is not sufficiently clear to ensure the operator understands the task and how to begin.
 - The JPM does not contain sufficient cues that are objective (not leading).
 - All critical steps (elements) have not been properly identified.
 - Scope of the task is either too narrow (N) or too broad (B).
 - Excessive overlap with other part of operating test or written examination.
4. Check the appropriate box when a job content error is identified:
 - Topics not linked to job content (e.g., disguised task, not required in real job).
 - Task is trivial and without safety significance.
5. Based on the reviewer's judgment, is the JPM as written (U)nacceptable (requiring repair or replacement), in need of (E)ditorial enhancement, or (S)atisfactory?
6. Provide a brief description of problem in the explanation column.
