Subject: *Response to NRC Regulatory Issue Summary 2000-04*

Gentlemen:

NRC Regulatory Issue Summary 2000-04, "Operating Reactor Licensing Action Estimates," dated March 16, 2000, requested all power reactor licensees to provide, on a voluntary basis, estimates of the number of new licensing action requests they plan to submit in the remainder of Fiscal Year (FY) 2000 and FY 2001. The following information is provided for Nine Mile Point Unit 1 and Unit 2 (NMP1 and NMP2) for remaining FY 2000 and FY 2001. It is based on the number of projected submittals requiring NRC review and approval prior to their implementation.

<u>NMP1</u>	<u>FY2000</u>	<u>FY2001</u>
Technical Specification Amendments	6	0
Other Submittals	3	3
<u>NMP2</u>		
Technical Specification Amendments	2	1
Other submittals	2	2

This information updates the information that was provided in Niagara Mohawk Power Corporation's letter dated October 14, 1999, in response to NRC Administrative Letter 99-02, "Operating Reactor Licensing Action Estimates," dated June 3, 1999.

Sincerely,

Richard B. Abbott
Vice President Nuclear Engineering
