SUBJECT: Oconee Nuclear Site
Docket Nos. 50-269, -270, -287
Response to NRC Bulletin 88-08, Supplement 1

By letter dated February 26, 1998, Duke Energy Corporation (Duke) provided Supplement 1 as an updated response to NRC Bulletin 88-08. In Supplement 1, Duke committed to perform thermal monitoring of the High Pressure Injection normal makeup and emergency injection lines until 1EOC18, 2EOC17, and 3EOC18 refueling outages and to submit a final supplement following completion of this monitoring. The proposed date for submitting this final supplement was July 1, 2000.

This supplement and its submittal date were also referenced in a February 17, 1999 response to Requests for Additional Information (RAI) relative to License Renewal.

The data has been collected on all three units and the analysis has been completed for Units 1 and 2. Based on an evaluation of the remaining effort, Duke now expects to provide the submittal by September 15, 2000.

Duke wishes to inform the NRC of this change in the expected submittal date in order to avoid any misunderstanding or confusion.

Questions regarding this revision of the expected submittal date may be directed to R. P. Todd at (864) 885-3418.

Very truly yours,

W. R. McCollum, Jr.
