PROPOSED RESPONSE SCHEDULE TO NRC SECY-99-182

Ladies and Gentlemen:

The NRC has requested by letter dated April 25, 2000, that H. B. Robinson Steam Electric Plant (HBRSEP), Unit 2 submit a date when requested comments, related to an NRC staff report, SECY-99-182, "Assessment of the Impact of Appendix R Fire Protection Exemptions on Fire Risk," will be submitted. The requested information requires a considerable amount of research and staff work before comments can be provided on the data assumptions and conclusions in the limited-scope study documented in SECY-99-182. Therefore, HBRSEP, Unit No. 2 requests an additional 60 days to evaluate the approach to the NRC assessment, at which time an expected completion time of the review and comment of the report data assumptions and conclusions will be provided.

If you have any questions on this subject, please contact Mr. H. K. Chernoff.

Sincerely,

for R. L. Warden
Manager - Regulatory Affairs
