KIT FOX (Vulpes macrotis)

The kit fox is considered by some to be the most beautiful of all American carnivores. In color they are a lovely grizzled white with light yellowish buff tones, and tail tipped with black, as are scattered long hairs. About 25 inches long, weighing from 4 to 6 pounds, they are desert dwellers, found on the western plains and foothills of the Rockies, where their food consists largely of lizards, insects and rodents.
