Docket No. 50-416
License No. NPF-29
UFSAR Update Package for Grand Gulf Nuclear Station Post
Refueling Outage 11

Reference: Letter from United States Nuclear Regulatory Commission to
M. A. Krupa, Entergy Operations, Inc. dated March 24, 2000
(CNRI-2000/00002)

GNRO-2000/00040

Gentlemen:

Pursuant to 10CFR50.71(e) and in accordance with the 10 CFR 50.4 exception granted by the above reference, Entergy Operations, Inc. hereby submits one signed original and one paper copy of the current Updated Final Safety Analysis Report (UFSAR) on a replacement-page basis. Each replacement-page contains the latest change number along with revision bars reflecting all changes made since the last update. Additionally, a complete copy of the Updated Final Safety Analysis Report (UFSAR) has been provided via CD-ROM. The UFSAR CD-ROM (electronic copy) is a complete copy of our 10CFR50 Appendix B (Section VI Document Control) Controlled Copy of the UFSAR. The 10CFR50 Appendix B Controlled Copy of the UFSAR is considered a living document. This means we are updating this Controlled Copy on a more frequent basis than called for in 10CFR50.71(e). Therefore, some of the revision bars provided in the UFSAR CD-ROM replacement-pages may not totally match what was provided in the replacement-page paper copy included in Attachments "A" and "B" (our living change process requires the next change to the living electronic copy of the UFSAR to clear the revision bars and supercede them with the new change revision bar).

Attachment "C" contains a detailed explanation of the CD-ROM technical details. Attachment "D" contains a list of effective pages identifying the current pages of the UFSAR.

I hereby certify, to the best of my knowledge, information, and belief, that the information provided in the attached UFSAR meets the requirements of 10CFR50.71(e) to update the UFSAR to within six months prior to the date of this submittal.

Should you have any questions, please contact this office.

Yours truly,

WAE/WBA/MJL
