DESCRIPTION OF CHANGES INCORPORATED BY MODIFICATION NO. 8

NRC-10-99-141

Page 2

The purpose of this modification is to: (1) revise the temperatures to be maintained in NRC's One White Flint North (OWFN) and Two White Flint North (TWFN) buildings during normal working hours for the heating and cooling seasons, and (2) add language to clarify when these temperatures shall be adjusted by the contractor. These changes shall be at no additional cost or obligation to the Government. Accordingly, the contract is hereby modified as follows:

Under Section C.2.2 entitled "BUILDING MECHANICAL OPERATIONS AND MAINTENANCE," paragraph B, "OWFN AND TWFN EQUIPMENT AND SYSTEMS OPERATIONS AND MAINTENANCE," the sixth paragraph is revised to reflect the temperatures required to be maintained by the contractor, and clarify when the contractor shall adjust these temperatures. These changes are reflected in the attached replacement page no. 12.

All other terms and conditions of the subject contract remain unchanged.

A summary of obligations, from award date through the date of this modification, is provided below:

FY99 Obligations:	\$1,423,230.00
FY00 Obligations:	\$2,105,940.00
Cumulative Obligations:	\$3,529,170.00

This modification does not obligate any funds.

Section C

and driveways. The Contractor is not responsible for landscaping, trash removal and custodial services.

The Contractor shall operate and maintain all mechanical, electrical, plumbing and utility systems to prevent interruption in services within the OWFN and TWFN buildings and grounds.

The Contractor shall ensure that the operation of these systems are in conformance with the energy and water conservation and efficiency requirements specified by the National Energy Conservation Policy Act (NECPA) of the Department of Energy.

The Contractor shall operate and maintain the Computerized Energy Management Systems for both buildings in order to maximize the life expectancy, functionality, and operation of the equipments and systems. The Computerized Energy Management Systems control the startups and shutdowns of the HVAC equipment and systems.

(NOTE: Refer to Section C.3.6.2 paragraph D. for Year 2000 Requirements for Computer Equipment, Software and Systems.)

The Contractor shall use operating personnel that have received certified training from the manufacturer's of the Staefa and Landis & Gyr Powers Automated (EMS) systems. All certifications shall be updated consistent with manufacturer's regulations and recommendations.

The Contractor shall maintain 68-72 degrees Fahrenheit temperatures during NRC's Regular Working Hours in the heating season and 74-78 degrees Fahrenheit during NRC's Regular Working Hours in the cooling season. The Contractor shall adjust temperatures when requested by FIXIT service requests to be within these ranges, or as requested by the NRC Project Officer. The Contractor shall start up or shut down the HVAC equipment earlier or later than the Contractor's Regular Working Hours, contingent upon weather conditions and building temperatures effected thereby. Such services shall be performed as basic services. The Contractor shall maintain building room temperatures during other than NRC's Regular Working Hours to assure the protection of the buildings when severe weather conditions exist.

Within sixty days after the contract take-over date the Contractor shall test all existing facility computer systems to include the following systems: Simplex Fire Protection, Energy Management Systems (Landis & Staefa and Capron Company) and warrant in writing to the CO that the systems operate with fault-free performance in processing date-related data including manipulation of data with dates prior to, thru and beyond January 2000. Should these systems require modification to be Year 2000 fault-free, the Contractor shall prepare a proposal for the specific work and costs associated to make the systems Year 2000 compliant. These services shall be performed as reimbursable contract services with prior approval by the CO.

The Contractor shall use outside air "free cooling" (Economizer Cycle), during moderate seasons based on outside air temperature and humidity conditions. The Contractor shall turn off the chillers and adjust fresh air dampers and other associated equipment whenever outside temperatures shall allow the Contractor to achieve free cooling of the OWFN and TWFN
