To Whom It May Concern:

I am writing to inform you that I feel that the nuclear power plants currently operating in the United States are unsafe, and are a deadly threat to us all. I have researched various power plants operating in America on the internet and found many to be unfit for safe operating, and many to have workers who are not properly trained in what to do in the event of an emergency. Also, many power plants are even without the proper emergency, and/or coolant systems to prevent a devastating meltdown.

I would like to suggest that our current nuclear power plants be immediately reevaluated and properly repaired and re-staffed to properly meet the peak of your NRC regulations, and specification. I am writing to you because I fear that one day a serious meltdown would unnecessarily cost the lives of thousands of innocent American citizens.

Sincerely,

Mark R. Williston Jr.
