

June 16, 2000

The Honorable Michael A. O'Pake
Pennsylvania Senate
1940 N. 13th Street
Reading, PA 19604

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
LIMERICK GENERATING STATION

Dear Senator O'Pake:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Limerick Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Thursday, July 6, 2000, at the Limerick Township Municipal Building located at 646 West Ridge Pike in Limerick, Pennsylvania. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Limerick Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5233. My e-mail address is CJC1@NRC.GOV.

Sincerely,

Curtis J. Cowgill, Chief
Projects Branch 4
Division of Reactor Projects

June 16, 2000

The Honorable Mark Scott
Chairman of the Berks County Commissioners
Berks County Services Center
633 Court Street, 13th Floor
Reading, PA 19601-3591

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
LIMERICK GENERATING STATION

Dear Mr. Scott:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Limerick Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Thursday, July 6, 2000, at the Limerick Township Municipal Building located at 646 West Ridge Pike in Limerick, Pennsylvania. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Limerick Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5233. My e-mail address is CJC1@NRC.GOV.

Sincerely,

Curtis J. Cowgill, Chief
Projects Branch 4
Division of Reactor Projects

June 16, 2000

Mr. Jeffrey Delp
Upper Frederick Township
Post Office Box 597
Frederick, PA 19435

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
LIMERICK GENERATING STATION

Dear Mr. Delp:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Limerick Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Thursday, July 6, 2000, at the Limerick Township Municipal Building located at 646 West Ridge Pike in Limerick, Pennsylvania. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Limerick Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5233. My e-mail address is CJC1@NRC.GOV.

Sincerely,

Curtis J. Cowgill, Chief

Mr. Norman D. Wheeler
Washington Township
Post Office Box 52
Barto, PA 19504

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
LIMERICK GENERATING STATION

Dear Mr. Wheeler:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Limerick Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Thursday, July 6, 2000, at the Limerick Township Municipal Building located at 646 West Ridge Pike in Limerick, Pennsylvania. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Limerick Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5233. My e-mail address is CJC1@NRC.GOV.

Sincerely,

Curtis J. Cowgill, Chief
