PURCHASE ORDER NO. 60-080004**

TITLE: Technical Support for Molten Fuel Coolant Interactions Research

I. BACKGROUND

The University of Wisconsin (UW) is completing an Office of Research (RES) funded contract on fuel-coolant interaction (FCI) research, which has provided experimental data to determine the enveloping conditions for occurrence of an energetic FCI and to estimate the energetics. The data has been used to develop and assess analytical models in the FCI codes. The codes are generally considered "fit-for-purpose" for some applications; however, for other applications (e.g., estimate of shock loading of the lower head, localized damage of cavity structures, etc.), better code accuracy and predictability are demanded. To meet the demand, it is necessary to have better measurements of spatial and temporal distributions of coarse breakup and fine fragmentation. Once developed, the successful measurement technique can be applied to other experimental programs on FCI and debris coolability.

II. OBJECTIVE

The objective of this work is to provide technical support in the development of instrumentation for measuring fuel-coolant mixing in order to better quantify coarse breakup and fine fragmentation. This type of quantification is necessary to achieve better predictability of analytical tools for fuel-coolant interactions calculations.

III. TECHNICAL AND OTHER QUALIFICATIONS REQUIRED

For successful performance of the work, the Principal Investigator should be an individual with qualifications and experience in FCI and related research areas. This individual should also have experience in directing experimental research and should have access to a team of research professionals and students.

IV. SCOPE OF WORK

Perform experiments with simulants at the WFCI facility to verify the capability of X-ray imaging technique to map the fuel-coolant mixing regions, to extract quantitative data from the maps, and to correlate the data for characterizing coarse breakup and fine fragmentation. Once the imaging capability is verified with simulants, provide necessary technical assistance to other organizations involved in FCI experimental research in the application of the technology to prototypic materials. When called upon, provide expert assistance on other FCI-related issues to the NRC staff.

TERMS AND CONDITIONS

(APPLICABLE TO OPEN MARKET NON-COMMERCIAL SIMPLIFIED ACQUISITIONS)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make the full text available. (Clauses which are not applicable are self-deleting.)

The following attachments are only applicable to vendors not currently receiving electronic payments authorized by the NRC.

Attachments:

1. Electronic Payment
2. ACH Standard Form 3881

Electronic Payment

The Debt Collection Improvement Act of 1996 requires that all payments except IRS tax refunds be made by Electronic Funds Transfer. It is the policy of the Nuclear Regulatory Commission to pay vendors by the Automated Clearing House (ACH) electronic funds transfer payment system. The electronic system is known as Vendor Express. Payment shall be made in accordance with FAR 52.232-33, entitled "Mandatory Information for Electronic Funds Transfer Payment."

To receive payment, the contractor shall complete the "Company Information" portion of the Standard Form 3881, entitled "ACH Vendor/Miscellaneous Payment Enrollment Form" found in Section J. The contractor shall take the form to the ACH Coordinator at the financial institution that maintains its company's bank account. **The contractor shall discuss with the ACH Coordinator how the payment identification information (addendum record) will be passed to them once the payment is received by the financial institution. To ensure that adequate payment information will be available to the contractor, the contractor should inform the financial institution that the addendum record must not be stripped from the payment.** Further information concerning the addendum is provided on page 2 of this attachment. The ACH Coordinator should fill out the "Financial Institution Information" portion of the form and return it to the Office of the Controller at the following address: Nuclear Regulatory Commission, Division of Accounting and Finance, Financial Operations Section, Mail Stop T-9-H-4, Washington, DC 20555. ATTN: ACH/Vendor Express. It is the responsibility of the contractor to ensure that the financial institution returns the completed form to the above cited NRC address. If the contractor can provide the financial information, signature of the financial institution's ACH Coordinator is not required. The NRC is under no obligation to send reminders. Only after the Office of the Controller has processed the contractor's sign-up form will the contractor be eligible to receive payments.

Once electronic funds transfer is established for payments authorized by NRC, the contractor needs to submit an additional SF 3881 only to report changes to the information supplied.

Questions concerning ACH/Vendor Express should be directed to the Financial Operations staff at (301) 415-7520.
