

June 20, 2000

LICENSEE: Virginia Electric & Power Company
FACILITIES: Surry Power Station, Units 1 and 2
North Anna Power Station, Units 1 and 2
SUBJECT: MEETING SUMMARY - CONVERSION TO IMPROVED STANDARD
TECHNICAL SPECIFICATIONS

On June 6, 2000, a meeting was held at NRC headquarters in Rockville, MD, to discuss Virginia Electric & Power Company's (VEPCO's) plans to convert to improved Standard Technical Specifications (iSTS). NRC staff discussed the review process and their experience with other plants that were planning to make, or had made, the conversion. VEPCO stated that their iSTS submittals are targeted for December 2000 (North Anna) and October 2001 (Surry). Also, implementation is scheduled for April 2002 (North Anna) and June 2003 (Surry). NRC staff indicated that, due to ongoing reviews of iSTS for other plants, full resources would not be available until about March 2001, for the North Anna review.

NRC indicated that, for the time interval from a few months prior to submittal until implementation, any separate TS amendment requests should be submitted in two formats, current TS and iSTS. NRC also advised VEPCO to prepare for rapid internal review and approval of last second issues shortly before iSTS issuance.

The meeting attendance list is enclosed.
