SUBJECT: NRC PUBLIC MEETING REGARDING NEW REACTOR OVERSIGHT PROGRAM

Dear Sir:

I am writing to invite you to participate in a public meeting designed to explain to members of the local community the Nuclear Regulatory Commission's (NRC) new reactor oversight process. The NRC staff has recently revised its oversight process, including how it inspects nuclear plant safety performance. The new process applies more objective, timely, safety-significant criteria in assessing safety performance at nuclear power plants, such as the Diablo Canyon Power Plant in your local area. We pilot tested this new process at 13 plants during a 6-month period in 1999. As a result of the pilot test, we made modifications to the process. Initial implementation of the new process began nationwide at all 103 nuclear power plants in April 2000.

We will hold our meeting between 7-8 p.m. on June 29, 2000, in the Embassy Suites, at 333 Madonna Road, San Luis Obispo. At this meeting we will give you a complete description of the new process and how it is being used at the Diablo Canyon Power Plant and provide you the opportunity to ask any questions pertinent to the new process.

If you would like information about our reactor oversight process, please use our WEB site address: www.nrc.gov/nrr/oversight/index.html. I hope you can attend our meeting. If you know of other individuals who would be interested in attending this meeting, I would appreciate your letting them know about the session.

If you have any questions, please contact Linda Smith at (817) 860-8137 or LJS@nrc.gov.

Sincerely,

/RA/

Linda Joy Smith, Chief
Project Branch E
Division of Reactor Projects
