Subject: Peach Bottom Atomic Power Station, Units 2 & 3
2000 Emergency Preparedness Exercise Scenario

Dear Sir/Madam:

This letter submits the scenario information for the Peach Bottom Atomic Power Station (PBAPS), Unit 2 and 3, 2000 Emergency Preparedness Exercise. This scenario information is being submitted 60 days prior to the scheduled August 15, 2000, exercise in accordance with the guidance provided in an NRC letter dated August 9, 1989, regarding the submittal of "Emergency Exercise Objectives and Scenario Guidelines." This exercise is a biennial full participation exercise which involves participation from offsite emergency response agencies.

The attached scenario package provides the scenario objectives, schedules, exercise rules, and controller contingency and simulator information. This package also contains data relating to plant conditions, radiation levels and release rates, and samples of the data to be presented. The attached scenario information is confidential in nature and is not for public disclosure. The August 9, 1989, letter identifies which individuals should receive copies of the exercise scenario information. However, based on discussions with NRC Region I representatives concerning the submittal of exercise objective and scenario information, the scenario package for the PBAPS 2000 Emergency Preparedness Exercise will only be distributed to those individuals involved in evaluating this exercise.

Mr. Jeffery Grisewood, Manager, Emergency Preparedness, has been designated as your interface for this emergency exercise. Please forward all future correspondence concerning this exercise to him at the address identified below:
