ATTENTION: Marvin Mendonca, Reactor Program Management Division.

Dear Marvin:

Please find enclosed two more promised items:

- (1) Emergency Plan.
- (2) Security Plan - to be restricted from public disclosure.

In both cases these are only slightly modified from those currently in place. Mostly I have used the opportunity to take out of these plans specific instrumental and procedural detail that would then free us to make replacements without having to revise the plan.

I hope these may prove satisfactory. There are still some of our personnel who haven't responded to my request for review, so there may be changes yet to be made on our end. I still thought it worthwhile to get your reviews now, so we can incorporate NRC recommendations along with any final "tweaks" of our own.

Regards,

George

George E. Miller

Marvin:
Sorry! Because of a miscommunication here, these didn't get sent out while I was gone. George

per Marvin Mendonca
conversation with
Lynn Silvrines - this
security plan is
2.7.90 and
not
safeguards
info.
