Forked River, NJ 08731

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
OYSTER CREEK NUCLEAR GENERATING STATION

Dear Ms. Laureigh:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Oyster Creek Nuclear Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Monday, July 31, 2000, at the Lacey Township Municipal Building Court Room, located at 818 W. Lacey Road in Forked River, New Jersey. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Oyster Creek Nuclear Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5146. My e-mail address is JFR@NRC.GOV.

Sincerely,

/RA/

John F. Rogge, Chief
Projects Branch 7
Division of Reactor Projects

We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Monday, July 31, 2000, at the Lacey Township Municipal Building Court Room, located at 818 W. Lacey Road in Forked River, New Jersey. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Oyster Creek Nuclear Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5146. My e-mail address is JFR@NRC.GOV.

Sincerely,

/RA/

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
OYSTER CREEK NUCLEAR GENERATING STATION

Dear Mr. & Mrs Gray:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Oyster Creek Nuclear Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Monday, July 31, 2000, at the Lacey Township Municipal Building Court Room, located at 818 W. Lacey Road in Forked River, New Jersey. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Oyster Creek Nuclear Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5146. My e-mail address is JFR@NRC.GOV.

SUBJECT: PUBLIC MEETING - NEW REACTOR OVERSIGHT PROCESS FOR THE
OYSTER CREEK NUCLEAR GENERATING STATION

Dear Mayor:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Oyster Creek Nuclear Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Monday, July 31, 2000, at the Lacey Township Municipal Building Court Room, located at 818 W. Lacey Road in Forked River, New Jersey. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Oyster Creek Nuclear Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5146. My e-mail address is JFR@NRC.GOV.

Sincerely,

/RA/

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff recently revised its oversight process and how it inspects nuclear power plant safety performance. The new process is more objective, timely, and focuses on the areas of greatest risk and safety significance at nuclear power plants such as the Oyster Creek Nuclear Generating Station which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result of our testing we made improvements in the process. Initial implementation of the new process began nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Monday, July 31, 2000, at the Lacey Township Municipal Building Court Room, located at 818 W. Lacey Road in Forked River, New Jersey. At this meeting we will give you a complete description of the new process and describe how the process is being used at the Oyster Creek Nuclear Generating Station. You will have an opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our Reactor Oversight Process you can use our Internet site address at: <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend the meeting. If you know of others outside of your organization who would be interested in participating in this meeting, I would appreciate your letting them know about the session.

If you have any questions please contact me at 610-337-5146. My e-mail address is JFR@NRC.GOV.

Sincerely,

/RA/

John F. Rogge, Chief
Projects Branch 7
Division of Reactor Projects
