Date: July 7, 2000

To: Persons Interested in Radioactive Waste Issues.

From:  David Stewart-Smith, Oregon Delegate NW Compact.

Subject: Notice of Public Meeting

The Northwest Interstate Compact on Low-Level Radioactive Waste Management Committee will hold a conference call meeting on July 21, 2000. The Committee conference call meeting begins at 3:00 p.m. P.D.T. and is open to the public. The purpose of this meeting is to finalize the Compact Committee's proposed decision regarding a request made by the Dawn Mining Company. At the June 13, 2000 meeting of the Committee, the Dawn Mining Company, in accordance with U.S. Nuclear Regulatory Commission guidance document 60 FR 49296, Criteria 8, sought the approval of the Compact Committee to dispose of non-11.e(2) material in a licensed 11.e(2) tailings disposal area. This material is classed as source material, and results from the treatment of Uranium Mine pit water. Following review and discussion of this issue, the Compact Committee concluded that in this instance the approval of the Compact Committee is not required.

The conference call will originate from the Headquarters Building of the Washington State Department of Ecology located at 300 Desmond Drive, Lacey Washington. Access is also available at the Eastern Regional Office of the Washington State Department of Ecology located at N 4601 Monroe, Suite 202, Spokane Washington. For those members of the public that would like to attend the conference call meeting at either of the Washington locations, please check in at the Reception Desk and you will be directed to the appropriate meeting room. For those members of the public that are located in Oregon, conference room H at the Oregon Office of Energy will monitor the call. Interested persons are welcome to sit in. For more information, contact Mike Garner, Executive Director, Northwest Interstate Compact, at (360)407-7102 or David Stewart-Smith at (800) 221-8035.
