

REGIONAL TECHNICAL ASSISTANCE REQUEST FORM

Date: July 13, 2000

**Mail or E-Mail to: Donald A. Cool (DAC), Director Mail Stop: T-8 F5, If E-mail, cc: CLE
Division of Industrial and Medical Nuclear Safety, NMSS**

**From: Douglas M. Collins (DMC), Director /RA/
Division of Nuclear Materials Safety, Region II**

**Licensee: Science & Technology Research, Inc.
License No.: N/A**

Control No: 258913 (if applicable)

Letter dated: May 30, 2000 (if applicable)

Problem/Issue: Applicant wants to manufacture and distribute a portable Ship Automatic Chemical Agent Detector and Alarm for the U.S. Navy. The device contains two 100 microcurie americium 241 sources. The applicant requested a custom review of the device but it requires a Sealed Source and Device Evaluation and Registration.

Action Required: Request IMNS review the applicant's request in accordance with the SS&D evaluation and registration procedures.

Recommended Action (with revisions): Approve or Reject

If the applicant's request is acceptable and a registration certificate is issued, RII will complete the licensing action to authorize the manufacture and distribution of the devices.

Remarks: Information relevant to the applicant's request is in ADAMs under the following accession numbers: 5/30/2000 Request - ML003720975

1/6/2000 Original Request which was abandoned - ML003673820

6/23/2000 Test results - ML003726687

6/28/2000 Drawing package - ML003730142
