U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555-0001

Subject: Termination of Review for CENPD-290-P, "ABB Generic Control  
Rod Design Methodology"

C-E Nuclear Power (CENP), formerly ABB-CE, submitted the subject proprietary  
Topical Report for NRC review and approval in February 1994.

This letter is to request that the Staff terminate review of this topical report and close  
TAC M89487. This topical is currently considered an information-only report; CENP  
would expect to update and resubmit this report if a future need for approval of this  
methodology is identified.

Please feel free to contact Virgil Pagen of my staff at 860-285-4700 or me if you have  
any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Ian C. Rickard". The signature is written in a cursive style and is positioned above a horizontal line.

Ian C. Rickard, Director  
Nuclear Licensing
