SUBJECT: QUESTIONNAIRE FROM NRC/STATE WORKING GROUP  
ON EVENT REPORTING

On January 27, 2000, a joint NRC/Agreement State working group was established to review the materials event reporting and assessment processes. The group's objective is to recommend how effectiveness and efficiency can be improved by reviewing lessons learned over the last few years. The processes include the NRC Generic Issues Program, the Nuclear Materials Events Database (NMED), and the exchange of event information between Agreement States and NRC. To support this review, the working group has developed a questionnaire to solicit your input on issues and concerns that should be considered.

We request that you complete the attached questionnaire and return it by **August 18, 2000**. If you have any questions, please contact one of the Co-Chairs listed below. A copy of the questionnaire has been provided to the Organization of Agreement States for transmittal to each Agreement State.

We thank you for taking the time to support this effort.
