SUBJECT: LICENSE APPLICATION DATED May 30, 2000 (REFERENCE: MAIL CONTROL NO. 258913)

This is to acknowledge the receipt of your letter dated May 30, 2000, and to inform you that the initial processing, which includes an administrative review, has been performed. There were no administrative omissions. However, after discussions with the NRC's Division of Industrial and Medical Nuclear Safety (IMNS) staff, we have determined that the Ship Automatic Chemical Agent Detector and Alarm (ACADA) will require a sealed source and device (SS&D) evaluation and registration.

We have forwarded your request and related materials to IMNS for evaluation as described in 10 CFR 32.210. While IMNS evaluates the ACADA, we will continue our technical review of your application to manufacture and distribute the device. We cannot issue the license until we resolve any as yet unidentified licensing issues and until IMNS issues the device registration certificate.

Your action has been assigned Mail Control Number 258913. When calling to inquire about this action, please refer to this mail control number. You may call me at 404-562-4738.

Sincerely,

/RA/

Jay L. Henson, Senior Health Physicist
Materials Licensing/Inspection Branch 1
Division of Nuclear Materials Safety
