MEMORANDUM TO: Charles R. Ogle, Chief
Division of Reactor Projects
Region II

FROM: David E. LaBarge, Senior Project Manager, Section 1 */RA/*
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: FEEDER REPORT: REVIEW OF 1999 REVISIONS TO UPDATED
FINAL SAFETY ANALYSIS REPORT FOR THE OCONEE NUCLEAR
STATION, UNITS 1, 2, AND 3 (TAC NOS. MA9367, MA9368,
AND MA9369)

By letter dated June 29, 2000, pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.71(e) and 10 CFR 50.4(b)(6), Duke Energy Corporation submitted the 1999 Update to the Final Safety Analysis Report (UFSAR) for the Oconee Nuclear Station (ONS), Units 1, 2, and 3.

In accordance with the Project Manager's Handbook, Section 4.5, "Updated Final Safety Analysis Report (UFSAR) Reviews," I have conducted an in-house review of the UFSAR submittal and resolved any questions resulting from this review. Therefore, based on the description contained in the UFSAR submittal, I have concluded that the FSAR changes described as having been performed in accordance with 10 CFR 50.59 were appropriately addressed by the licensee. In addition, I compared the amendments processed during 1999 that indicated FSAR changes would be needed and determined that they were adequately reflected in the UFSAR. The submittal satisfies the reporting requirements of 10 CFR 50.71(e).

This completes NRR activities related to the UFSAR submittal and closes the TAC numbers listed above. In accordance with the Project Managers Handbook, I request that this review be reflected, as appropriate, in a future inspection report.

Docket Nos. 50-269, 50-270, and 50-287
