

July 20, 2000

MEMORANDUM TO: James T. Wiggins
Office of the Executive Director for Operations

FROM: Ashok C. Thadani, Director **/RA/ M. Federline for:**
Office of Nuclear Regulatory Research

SUBJECT: PROPOSED GENERIC ISSUE - THE POTENTIAL FOR RESONANCE
VIBRATIONS OF STEAM GENERATOR TUBES DURING A MAIN
STEAM LINE BREAK EVENT

The Office of Nuclear Regulatory Research (RES) has completed its review of the proposed generic safety issue (GSI), submitted in your June 27, 2000, memorandum, which addresses the potential safety impact of the resonance vibration of steam generator tubes during a a main steam line break event. We have concluded that adequate background information has been provided for RES to process the proposed GSI in accordance with the Draft Management Directive 6.4, "Generic Issue Program," which is currently undergoing trial use. Thus, the GSI has been assigned the number 188 for tracking purposes. It is expected that a technical screening of the GSI-188 will be completed by the end of October 2000. All questions on the status of the GSI should be directed to Ronald C. Emrit, 415-6447.
