Subject: Re: Georgia

Dear Chairperson,

I am a concerned citizen of Georgia and I am very alarmed at the proposal to set up a outdoor nuclear waste dump by the Southern Company in Baxley, Georgia. With this untested system which uses casks (aside from computer testing), I think there is great reason for concern for its use in this particular area which is a floodplain, and also subject to possible natural disasters, not to mention the impact that it could have on the surrounding environmental treasures which are located nearby. Please keep in mind that there are many good reasons why such a proposal should be rejected and I hope you keep in mind that citizens such as myself strongly object to our lives as well as the natural surroundings to be jeopardized by such a project.

Sincerely,

Cecilia Herles
