James W. Davis
DIRECTOR
OPERATIONS DEPARTMENT,
NUCLEAR GENERATION

July 25, 2000

Dr. William D. Beckner, Branch Chief
Technical Specifications Branch
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

SUBJECT: Forwarding of TSTFs

PROJECT NUMBER: 689

Dear Dr. Beckner:

Enclosed are three revised Technical Specification NUREGs NEI Technical Specification Task Force (TSTF) Travelers which address staff comments: TSTF-334 Rev. 1, TSTF-336 Rev. 1, and TSTF-361 Rev. 2.

In addition, TSTF-335 proposed clarifications to the ice condenser ice weighing technical specifications. As a result of the December 9, 1999, NRC letter to the Tennessee Valley Authority on the Sequoyah Nuclear Plant license amendment request to adopt TSTF-335, the Ice Condenser Utility Group (ICUG) reevaluated the TSTF and determined that the initial approach taken may not necessarily provide the desired improvements. Based on the current ICUG efforts and recommendations, TSTF-335 is withdrawn. A new Traveler will be submitted pending the results of the ICUG's further evaluation of ice weighing technical specifications.

Please contact me at (202) 739-8105 or Vince Gilbert at (202) 739-8138 if you have any questions or need to meet with industry experts on these recommended changes.

Sincerely,

A handwritten signature in black ink, appearing to read "James W. Davis", is written over a horizontal line. The signature is fluid and cursive.

James W. Davis
