

August 9, 2000

Thelma Wideman, Director
Emergency Management, Wayne County
7336 Rt 31
Lyons, NY 014489

Dear Ms. Wideman:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the R. E. Ginna Nuclear Power Plant, which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, August 30, 2000, at the Ontario Golf Club, in Ontario, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Ginna Station. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5224. My e-mail address is mge@nrc.gov.

Sincerely,

/RA by William A. Cook
Acting For/

Michele G. Evans, Chief

August 9, 2000

The Honorable Marvin Decker
Board of Supervisors - Wolcott
P.O. Box 237
Wolcott, NY 14590

Dear Mr. Decker:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the R. E. Ginna Nuclear Power Plant, which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, August 30, 2000, at the Ontario Golf Club, in Ontario, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Ginna Station. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5224. My e-mail address is mge@nrc.gov.

Division of Reactor Projects

August 9, 2000

Gary K. Pence, Director
Monroe County Department of Public Safety
2100 City Place
33 N. Pitzhugh Street
Rochester, NY 14614

Dear Mr. Pence:

I am writing to invite you and other members of your organization to participate in a public meeting designed to explain the Nuclear Regulatory Commission's (NRC) new Reactor Oversight Process to members of the local community. The NRC staff has revised its oversight process and how it inspects nuclear power plant safety performance. The new process applies more objective, timely, and safety significant criteria in assessing safety performance at nuclear power plants, such as the R. E. Ginna Nuclear Power Plant, which is in your local area. We tested this new process at 13 plants during a six-month period in 1999. As a result, we made improvements in the process and began initial implementation nationwide at more than 100 commercial nuclear power plants in April 2000.

We will hold our meeting between 7:00 p.m. and 9:00 p.m. on Wednesday, August 30, 2000, at the Ontario Golf Club, in Ontario, New York. At this meeting we will give you a complete description of the new process and describe how the process is being used at Ginna Station. You will have the opportunity at the meeting to ask questions pertinent to the new process.

In the meantime, if you would like information about our new Reactor Oversight Process, you can use our Internet site address at <http://www.nrc.gov/NRR/OVERSIGHT>. I hope you and other members of your organization can attend our meeting. If you know of others outside of your organization who would be interested in participating in the meeting, I would appreciate you sharing this information with them.

If you have any questions, please contact me at (610)337-5224. My e-mail address is mge@nrc.gov.

Sincerely,

/RA by William A. Cook
Acting For/

Michele G. Evans, Chief
