

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

Overall

2. Please state your comment(s)?

The ethical implications for the government agencies involved, the nuclear power industry, the people of UT whose ancestors contributed to the current intolerable situation for both the Goshute and the existing toxic uses of land in the Skull Valley region are not addressed. This is far from a good guys - bad guys issue; the ethical decision making has been lacking in the past, now, and apparently in the future.

3. To receive a copy of the final EIS please provide your mailing address

Name: Dr. J. M. Valenti

Organization: Brigham Young Univ.
