

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

My comments are general in nature.

2. Please state your comment(s)?

The N.R.C. seems to be coopted by the nuclear industry. Once the nuclear spent fuel rods are here, what would make the storage facility temporary and not permanent? The nuclear industry P.R. team seems to be playing the tribe against itself. They also are trying to play up the issue of sovereignty. The only time native American's sovereignty is respected is when the corporations want to build a casino, a jail or dump nuclear fuel & toxins. Why did our packs get checked by the police and why you use black women as your front P.R. people? We need more hearings. We have to have more hearings all along the transportation route. We don't have the emergency response teams to deal accidents which happen all the time along the rail & road lines. I have hiked Desert Peak seven times & a chill will go up my spine every time I hike that peak.
