U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Gentlemen :

Subject: Siemens Power Corporation Emergency Assessment Resource Manual

Enclosed are six copies of the revised Siemens Power Corporation (SPC) Emergency Assessment Resource Manual (EARM).

The EARM was developed to be used as a first responder tool in the event of an accident involving the airborne release of radiological or hazardous material. The basic assumption of EARM is that the most rapid initial emergency response can be provided through the use of predetermined bounding scenarios and consequences.

This is a complete revision and you are requested to keep the existing tabbed dividers and to add the new ones enclosed. The document contains information proprietary to SPC and an affidavit to that effect is enclosed.

Very truly yours,

James B. Edgar
Staff Engineer, Licensing

Affidavit of Raymond E. Vaughan

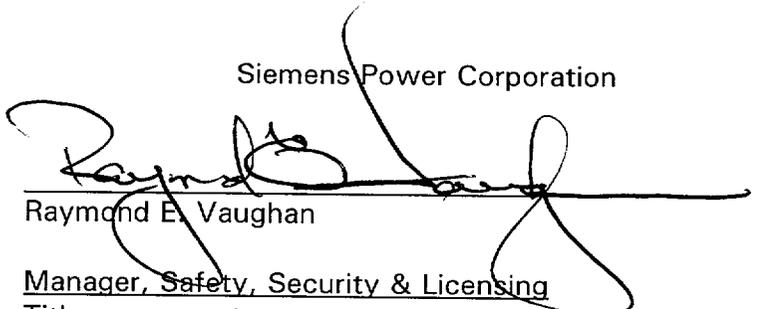

I, Raymond E. Vaughan, being first duly sworn, depose and says:

- 1. I am Manager, Safety, Security & Licensing of Siemens Power Corporation, a corporation duly organized and existing under and by virtue of the laws of the State of Delaware, with offices at 2101 Horn Rapids Road, City of Richland, County of Benton, State of Washington, and on whose behalf I make this affidavit.
- 2. I am familiar with the contents of Siemens Power Corporation's "Emergency Assessment Resource Manual (EARM)." This document:
 - (i) has been held in confidence by Siemens Power Corporation pursuant to its internal policies, (ii) is presented to the U.S. Nuclear Regulatory Commission in confidence, and (iii) is not available from public sources.

I am authorized to make the statements that are set forth herein and in the above - mentioned document on behalf of Siemens Power Corporation. The statements made in this affidavit are, to the best of my knowledge, information and belief, truthful and complete.

Siemens Power Corporation
