Dear Ms. Kime:

Attached is a memorandum from a member of my staff, indicating the inappropriate listing of certain registration numbers for The Monsanto Company on the NRC SSD web page. I wanted to bring this to your attention.

If you have any questions, please contact Karl Von Ahn at (614) 644-2727.

Sincerely,

Robert E. Owen

RE: Monsanto device registration listing errors

Monsanto Company, Dayton Laboratory

1515 Nicholas Road

Dayton, OH

The Monsanto Company vendor code 0466 is for the mail box and physical address, whereas a vendor code 0882 is used for the physical address. Both are the same facility. It appears that Monsanto Company withdrew all its SSD registrations associated with the Dayton Facility in 1992.

However, there is a list of active registrations for Monsanto Company on the NRC SSD web page that are not active registrations. These devices are not listed as active registrations in the SSD Registry Index as supplied by the NRC. The registrations were inactivated in May 1992 as indicated in the following table. We need to notify the NRC that the registrations in the first column are posted to the web in error and need to be removed.

Also, the sealed sources listed in SSD index section Active Vendor/ Inactive devices included three for the Monsanto Dayton branch that were terminated in the mid 1960's. (These are listed as inactive on the web page.) The information in each of device's files supplied to us from the NRC contains only the two-page device registration as posted on the web.

We need to change the vendor code to an inactive vendor code (466 to 882) since Monsanto is no longer located at that address and update to the proper product code. The product codes would be 826, 827, and 828. Should we check with the NRC with regards to the best procedure for termination and renumbering of the following registrations? (For example, a cover letter vs cover page vs reissue of registration.)
