

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

I am opposed to all of it, as the whole idea is a travesty and morally wrong from the "get-go." (Western talk). DEIS is a misnomer.

2. Please state your comment(s)?

Westerners' environmental issues have not been addressed responsibly, in my opinion. I realize your committee is between a rock and a hard place. <sup>HOWEVER,</sup> My simplistic mind thinks it's time to deactivate the nuclear reactors and stop the waste nuclear products. - a huge project, but a humane one nevertheless. Make your efforts in the right direction! Please do not foist this monster idea misquoting as a solution on the residents of these Western States - and Utah in particular. In addition, to take advantage of the already disadvantaged is unconscionable. (Exstates). - But then, you can't see them from your D.C. offices, can you?

3. To receive a copy of the final EIS please provide your mailing address.

I hope there is a collective soul-searching on this issue - that there will not be an EIS. I'll simply sign myself as follows: Western U.S. Citizen - a mother and grandmother concerned that there will be future generations.
