

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

private fuel storage proposal  
& NRC's safety evaluation report

2. Please state your comment(s)?

*nuclear waste* There is earthquake potential & underground shifting that is highly likely as earthquake fault is a reality that seems to be ignored. Leakage could occur, etc.

There is <sup>expensive</sup> technology available to neutralize nuclear waste. <sup>Japan</sup> Money is not more important than human ~~waste~~ life or any life. Burying waste is inexpensive.

Would our great, great grandchildren's great great grandchildren remember ~~that~~ where nuclear waste dumps are?

Thank you. Great meeting.

*from what I understand Goshute tribe has been divided on this issue*

3. To receive a copy of the final EIS please provide your mailing address
