Subject: Nuclear 1E Qualification of the TRICON TMR Programmable Logic Controller (PLC) – Corrected Pages – Previously Submitted Document

Reference: 1. Letter, T. Martel (Triconex) to NRC, July 17, 2000, subject; Nuclear Qualification of the TRICON TMR PLC – Project Qualification Document Submittal (Proprietary Documents)

2. Project Number 709

Gentlemen:

In Reference 1, Triconex submitted documents containing proprietary information for NRC review in connection with the Nuclear 1E Qualification of Triconex PLC Controllers. One of the documents in this submittal, the Software Qualification Report 7286-535, Rev 1, had publishing errors on two of the pages which have been corrected since the submittal. The purpose of this letter is to transmit corrected pages to this report and request that the enclosed replacement pages be inserted in the NRC record copy of this report. Since the Software Qualification Report was submitted as Triconex Proprietary under 10CFR2.790, the enclosed pages should be processed in a manner consistent with the original report. Accordingly, a copy of the original Affidavit and Request for Withholding From Public Disclosure applicable to this report is also enclosed for your information.

If you have any questions regarding this document, please contact me at (281) 360-6401 or Mr. Michael Phillips at (949) 699-2111.

Sincerely,

FOR TROY MARTEL

J. Troy Martel, P. E.
Triconex Nuclear Qualification Project Director
