SUBJECT: U.S. Geological Survey (USGS) Detailed Monthly Status Report for March, 1991

Dear Carl:

Enclosed is the USGS detailed monthly status report for March, 1991. This report is in a slightly different format than past reports because we have used schedule status information as the basis for the report, and schedule activity codes are cross-referenced. The format may continue to be modified somewhat as we try to combine reporting requirements for the Planning and Control System (PACS) with other reporting requirements. Because status was requested as a cumulative percent and this was the first month using a new input form, much of the input provided was a summary of work performed year to date rather than specific to March and that is what is provided here.

If you have any questions or comments, please contact Raye Ritchey at FTS 776-0517.
