

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

Potential Environmental Impacts

2. Please state your comment(s)?

We in Utah already have far more than our fair share of 'dirty businesses' already. In Moab, the Atlas tailing continue to leak into the Colorado. We already in Tooele county have an Army weapons incinerator project. There are conflicting views of the safety of that project, but many of us are convinced of its danger. I know I do not want to raise children in this state, so beautiful, but also, now the national dump we are constantly told that nuclear projects are safe, but, as Utahns, we know that is wrong. All health amongst friends and fellow citizens. The use of the Goshute Indian Skull Valley site to store nuclear spent fuel would provide another threat to the people of Utah -- it is lethally radioactive for many thousands of years. This is not a 'temporary' problem. Cumulative radiation effects are not clear. Please allow more time to consider this horrible project.
