

The U.S. Nuclear Regulatory Commission (NRC) invites your  
 comments on the Draft Environmental Impact Statement for the  
 Construction and Operation of an Independent Spent Fuel Storage  
 Installation on the Reservation of the Skull Valley Band of Goshute  
 Indians and Related Transportation Facilities

(57)

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

= General Comments on DEIS

2. Please state your comment(s)?

Utah is already an environmental mess. We need to clean it up, not make it worse. The NRC has not proven that transportation is safe, nor has it clearly addressed the accident response. The democratic process was undermined by deciding to use the Goshute Skull Valley reservations where the majority of Goshutes don't even live.

Additionally, "temporary" storage is not the solution to our society's problem with not knowing what to do with our nuclear waste. The only solution to this issue is stop creating this waste until a safe and effective way to dispose of spent nuclear fuel and therefor recommend NO ACTION.

3. To receive a copy of the final EIS please provide your mailing address
