

The U.S. Nuclear Regulatory Commission (NRC) invites your ⁽⁶¹⁾ comments on the Draft Environmental Impact Statement for the Construction and Operation of an Independent Spent Fuel Storage Installation on the Reservation of the Skull Valley Band of Goshute Indians and Related Transportation Facilities

1. To ensure your comments are appropriately considered, please indicate the sections or areas of the DEIS your comment(s) is directed toward?

Transportation - Storage.

2. Please state your comment(s)?

If it is such a good idea to transport and store nuclear fuel in Utah it would be an even better idea to store it on site in the states where this waste is produced. Let the utility companies who dabbled in nuclear power pay the total cost for their indulgence in this form of energy production. Store it in the state where it's produced. Utility companies pay all costs. Phase out nuclear power industry; the waste production is a Frankenstein monster. Save transport cost; store where it's produced.

3. To receive a copy of the final EIS please provide your mailing address
