

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 23, 2000

Dr. Robert Mallett, President
Mallett Technology
100 Park Drive, Suite 204
Post Office Box 14407
Research Triangle Park, NC 27709-4407

SUBJECT: LETTER OF APPRECIATION

Dear Dr. Mallett:

On behalf of the U.S. Nuclear Regulatory Commission (NRC), the Spent Fuel Project Office (SFPO) would like to express our appreciation for the exceptional work of several of your employees, Dr. Abed Khaskia, Mr. Matthew Mehalic, Mr. Gerry Pugliese, and Ms. Kim Porter.

The NRC staff has recently undertaken an initiative to develop capabilities in finite element modeling and analysis using the SolidWorks solid modeling and ANSYS finite element analysis (FEA) programs. Your employees provided complete and comprehensive training and technical support, tailored specifically to our needs. Your employees also provided, and continue to provide, superior support and scheduling services, which have enabled my staff to obtain the necessary software and training to apply FEA in our reviews of technical issues related to storage and transportation of radioactive materials.

Sincerely,

/RA/

M. Wayne Hodges, Deputy Director
Technical Review Directorate
Spent Fuel Project Office
Office of Nuclear Material Safety
and Safeguards
