09-08-00

Hon. Vice-President Al Gore, Sir:

Please immediately revoke any permits issued, and permit no further action which might allow the least radioactive material, whether known or of undetermined radioactive extent, from entering into private enterprise or any other means of reaching the consuming public in any form.

To the extent radioactive "release" has occurred, please initiate recapture action without the slightest delay. Also, please work for international prohibition of any radioactive release.

It would be most good of you to assure wide public awareness of these essential actions at the earliest opportunity after you have initiated them.

Such release of radioactive materials is a critical risk to the public health. It must not be allowed, approved nor permitted.

Thank you for your prompt address of this very real public concern.

Most Sincerely,

Brice Farwell,
Citizen of Oregon
