Dresden Nuclear Power Station Units 2 and 3  
Facility Operating License Nos. DPR-19 and DPR-25  
Docket Nos. 50-237 and 50-249

Subject: Proprietary Review of NRC Staff Audit of NRC Bulletin 96-03 Compliance

Reference: Letter from L.W. Rossbach (USNRC) to O.D. Kingsley (ComEd) "Dresden Report on NRC Staff Audit of Resolution of issues identified in NRC Bulletin 96-03" dated August 27, 2000

In the referenced letter, the NRC transmitted its report of a March 1999 audit of Dresden Nuclear Power Station, Units 2 and 3, resolution of issues identified in NRC Bulletin 96-03, "Potential Plugging of Emergency Core Cooling Suction Strainers by Debris in Boiling-Water Reactors." Your report on this audit consisted of an NRC memorandum and a Los Alamos National Laboratory report and we were requested to identify if either document contains proprietary information pursuant to 10 CFR 2.790, "Public inspections, exemptions, requests for withholding."

Our review has concluded that neither document contains any proprietary information.

However, we would like the opportunity to discuss some of the information contained in this audit report and will arrange both the nature and date of this meeting through our Project Manager.
