MEMORANDUM TO: Those on the Attached List

FROM: John W. N. Hickey, Chief **/RA/**
Materials Safety and Inspection Branch
Division of Industrial and
Medical Nuclear Safety, NMSS

SUBJECT: PROPOSED REVISIONS TO NRC FORM 314, "CERTIFICATE OF
DISPOSITION OF MATERIALS

I am writing to provide you an opportunity to review and comment on proposed changes to NRC Form 314, "Certificate of Disposition of Materials" (Form 314). The attached DRAFT of Form 314 provides licensees with the additional option of confirming that any remaining residual radioactivity is within the limits of 10 CFR 20.1402 for the License Termination Rule. The Draft also includes revisions to correct references to the regulations, as well as some minor editorial corrections. OGC has reviewed the Draft Form 314 and has no legal objection to the proposed revisions.

Note that NRC Form 314 asks licensees to confirm "the absence of licensed materials." The attached revision asks licensees to confirm that radioactive material has been removed such that any remaining contamination is within the limits of the License Termination Rule.

Please provide any comments on the proposed revisions to Form 314 within two weeks.

Attachment:
Draft Form 314
