JUN 19 1991

Mr. John J. Linehan, Acting Director
Repository Licensing and Quality Assurance
Project Directorate
Division of High-Level Waste Management
Office of Nuclear Material Safety
and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Linehan:

The Yucca Mountain Quality Assurance Division (YMQAD) has completed its review and evaluation of the Science Applications International Corporation/Technical & Management Support Services (SAIC/T&MSS) Quality Assurance Program Description Document (QAPD), Revision 3.

As a result, it has been determined that the proposed changes are consistent and in compliance with the Office of Civilian Radioactive Waste Management Quality Assurance Requirements Document, Revision 4, and that there has been no relaxation of the requirements. Also, Revision 3 of the QAPD contains changes to address comments generated as a result of the U.S. Nuclear Regulatory Commission (NRC) review of the QAPD, Revision 1 (NRC letter, Linehan to Shelor, dated February 13, 1991, and DOE letter, Shelor to Linehan, dated April 24, 1991). These changes have been accepted by the NRC (NRC letter, Linehan to Shelor, dated May 6, 1991).

Therefore, the subject document (Enclosure 1) and its associated Requirements Matrix, Revision 2 (Enclosure 2), which has also been reviewed and accepted by the YMQAD, are enclosed for NRC review.
