

MEMORANDUM TO: Joseph A. Murphy, Chairman July 19, 1999
Committee to Review Generic Requirements

FROM: Samuel J. Collins, Director Original Signed By:
Office of Nuclear Reactor Regulation

SUBJECT: CRGR REVIEW OF FINAL RULE, RESPIRATORY PROTECTION

In accordance with the CRGR Charter, this memorandum provides my determination that the deletion of two reporting requirements, an optional relaxation proposed in the subject final rule and approved by the staff, will continue to adequately maintain public health and safety. This determination is based on the staff's CRGR CHARTER REVIEW PACKAGE that was provided to the CRGR in the memorandum to you from R. Zimmerman dated June 30, 1999. The regulatory analysis performed for this rulemaking concludes that there is also a minimal cost savings associated with this relaxation. I concur that deletion of these two reporting requirements will have no impact on public health and safety.
