Subject: CRGR ENDORSEMENT OF PART 20 AMENDMENTS

THIS E-MAIL IS BEING RE-SENT TO CORRECTLY ADDRESS THE RECIPIENTS AS DAVE MATTHEWS (INSTEAD OF GARY HOLAHAN) AND SCOTT NEWBERRY.

With the following exception, the CRGR Chairman has accepted the Part 20 rulemaking package, which was revised to address the Committee's comments and recommendations offered at CRGR Meeting No. 343, held on July 13, 1999:

Regulatory Analysis, Item 5, "Value Impact Analysis": In the later part of the first bullet "...150 non-power reactor licensees" **must be changed to "...150 nuclear materials licensees,"** because the word "non-power reactor" has a very specific connotation in NRR where it is used to designate the test, research and training reactors. Furthermore, the Committee regards the statement in the fourth bullet to be true when the estimated figure of 200,000 workers also includes those at the materials facilities.

Draft Federal Register Notice: The Chairman has accepted the staff's arguments in favor of a Fit Factor of 500, on the basis safety margin considerations.

Continent upon specific correction to be made to the first bullet, as noted above, this e-mail formally relays the CRGR endorsement of the Part 20 amendments.

Raji (415-7584)
