Re: NRC Materials License #06-30218-01 renewal additional information

Mr. Stephen Courtemanche:

The following information is provided for the continued review of our license renewal application.

ITEM 1

Robert Lehman, MD, is required as an authorized user to this license.

ITEM 2

Attachment 8.1 indicates the training criteria. The after hours house keeping and cleaning service does not enter into the Hot Lab, therefore, this personnel does not encounter sources which are not in safe storage.

ITEM 3

Attachments 9.1a thru d are the facility diagrams. Notice the undercounter storage space in the Hot Lab. The contaminated wastes are stored in this cabinet for the required decay period. The wastes are discarded if the survey indicates background radiation level.

Should you have any questions or desire additional information regarding our private, nuclear cardiology imaging office, please contact me at 203-573-1435.

Respectfully submitted,

Denise M Condron RSO
